Incorporation.ai

Incorporation.AI offers a range of AI solutions depending on the complexity from single purpose to multifunction and digital clones with AI.Factory for enterprises that want to harness the power of AI and their existing teams to succeed in today's Intelligence Revolution

Documentation Automation

Document process automation is the design of systems and workflows that assist in the creation of electronic documents. These include logic-based systems that use segments of pre-existing text and/or data to assemble a new document. This process is increasingly used within certain industries to assemble legal documents, contracts, and letters.

Benefits

- Minimises data entry
- Reduces the time spent proof-reading
- Reduces the risks associated with human error
- Makes faster decisions using data from your documents
- Data accuracy and compliant
- Data meets customer expectations and improves CSAT, advocacy, lifetime value, and spend.

Details

Document process automation is the need for the digital era. A lot of work was happening in this field but recent developments using cutting edge technologies like deep learning and Artificial Intelligence have completely revolutionised this domain.
